

Association of Information Technology Professionals  
The Air Capital Chapter

2008 Program Topics		
January 17	How to go from Here to There	Understanding new technologies and the next phase of platforms. Migration paths and moving from “current” to “new” in a Microsoft world.
February 21	Annual Technology Update	Randy Johnston – Annual technology review with what is headed our way.
March 20	Licensing	Making sense of current and proposed software licensing choices in an ever-changing software world; Retail, OEM, Volume Licensing, Software Assurance, and the new Open Value Licensing.
April 17	Project Planning	Planning for the purchase including ROI calculations, budgeting and the process and implementation – plus don't forget training.
May 15	Let's Not Forget 3 <sup>rd</sup> Party Software	It's not just a Microsoft world out there. What makes an office and business full of applications work well and interface together safely.
Summer Break – June, July & August		
September 18	How to Tweak what you Bought	Making it operate, better, faster and safer. From out-of-the-box to full production.
October 16	How to Manage Your Information	The perplexing compliance – Federal rules and regulations; corporate mandates; auditing and security requirements, along with integration of IT into the business process.
November 20	Business Continuity, Disaster Planning and Recovery	Changes in focus for IT from backups and getting it restored successfully and what options are available for continuous data and system protection.
December	No Meeting
